

Volume 109: Chapter 7: Plate 2: Unprocessed full waveforms recorded during ODP Leg 109 by the multichannel sonic tool (MCS) at receiver 4 plotted as a function of depth in DSDP Hole 395A. Note casing effect extending to 116 mbsf. Susceptibility log and magnetic field logs, DSDP Hole 395A. Susceptibility log in track 1, vertical magnetic field measured with BGR magnetometer probe in track 2, horizontal magnetic field measured with Japanese magnetometer in track 3, and vertical magnetic field measured with Japanese magnetometer in track 4.
