

Chapter 35, Figure 3

Figure 3. Stratigraphic summary and distribution of planktonic foraminifers in the Albian to Maastrichtian of Hole 762C.

ZONES		Sampling		Comments	
	Vertical shading represents range of uncertainty between samples		Present		Uncertain
			Rare		Caved
	Possible		Common		Reworked
	Probable		Abundant		
	Confident		Dominant		
Boundary types		BIOZONES - Microfossil Zone			
	Possible		810.22 - 810.22		W. archaeocretacea
	Probable				
	Confident				
	Unconformity				
	Uncertain unconformity				
Chronostratigraphy		Age			
	807.93 - 810.02		Turonian		

Figure 4. Stratigraphic summary of the Albian to Campanian in Hole 763B.

ZONES	
	Vertical shading represents range of uncertainty between samples
	Possible
	Probable
	Confident
	Unconformity
	Uncertain unconformity
