

PROCEEDINGS OF THE OCEAN DRILLING PROGRAM

VOLUME 127/128 SCIENTIFIC RESULTS PART 2

JAPAN SEA

Covering Legs 127 and 128 of the cruises of the Drilling Vessel *JOIDES Resolution*

Leg 127: Tokyo, Japan, to Pusan, South Korea, Sites 794-797,

19 June 1989-20 August 1989

Leg 128: Pusan, South Korea, to Pusan, South Korea, Sites 794, 798-799,

20 August 1989-15 October 1989

Leg 127

Kensaku Tamaki, Kenneth A. Pisciotto, James Allan, Joanne M. Alexandrovich, David A. Barnes, Sam Boggs, Hans-Jürgen Brumsack, Charlotte A. Brunner, Adrian Cramp, Laurent Jolivet, Orest E. Kawka, Itaru Koizumi, Shin'ichi Kuramoto, Marcus G. Langseth, James McEvoy, Jeffrey A. Meredith, Karl A. Mertz, Jr., Richard W. Murray, David C. Nobes, Atiur Rahman, Ralph Schaar, Kathryn P. Stewart, Ryuji Tada, Peter Thy, Luigi Vigliotti, Lisa D. White, Jobst J.M. Wipperm, Shigeru Yamashita

Shipboard Scientists

Leg 128

James C. Ingle, Jr., Kiyoshi Suyehiro, Marta T. von Breymann, James S. Bristow, Lloyd H. Burckle, Jacques Charvet, Barry A. Cragg, Peter B. deMenocal, Robert B. Dunbar, Karl B. Föllmi, John R. Griffin, Kurt A. Grimm, Yozo Hamano, Naoshi Hirata, Peter Holler, Caroline M. Isaacs, Michio Kato, Richard Kettler, Tara Kheradyar, Klaus A.O. Krumsiek, Hsin-Yi Ling, Ryo Matsumoto, Jay P. Muza, Ronald J. Parkes, André Pouclet, Steven D. Scott,

Ruediger Stein, Anne A. Sturz

Shipboard Scientists

Leg 127: James Allan

Leg 128: Marta T. von Breymann

Shipboard Staff Scientists

Editorial Review Board:

Part 1: Kenneth A. Pisciotto, James C. Ingle, Jr., Marta T. von Breymann, John Barron

Part 2: Kensaku Tamaki, Kiyoshi Suyehiro, James Allan, Michael McWilliams

Prepared by the

OCEAN DRILLING PROGRAM

TEXAS A&M UNIVERSITY

Norman J. Stewart, William R. Winkler, Sondra K. Stewart, Elsa K. Mazzullo, and Amanda R. Masterson

Volume Editors

in cooperation with the
NATIONAL SCIENCE FOUNDATION
and
JOINT OCEANOGRAPHIC INSTITUTIONS, INC.

This publication was prepared by the Ocean Drilling Program, Texas A&M University, as an account of work performed under the international Ocean Drilling Program, which is managed by Joint Oceanographic Institutions, Inc., under contract with the National Science Foundation. Funding for the program was provided by the following agencies at the time of this cruise:

Canada/Australia Consortium for the Ocean Drilling Program, Department of Energy, Mines and Resources (Canada) and Department of Primary Industries and Energy (Australia)

Deutsche Forschungsgemeinschaft (Federal Republic of Germany)

European Science Foundation Consortium for the Ocean Drilling Program (Belgium, Denmark, Finland, Iceland, Italy, Greece, The Netherlands, Norway, Spain, Sweden, Switzerland, and Turkey)

Institut Français de Recherche pour l'Exploitation de la Mer (France)

National Science Foundation (United States)

Natural Environment Research Council (United Kingdom)

University of Tokyo, Ocean Research Institute (Japan)

Any opinions, findings, and conclusions or recommendations expressed in this publication are those of the author(s) and do not necessarily reflect the views of the National Science Foundation, the participating agencies, Joint Oceanographic Institutions, Inc., Texas A&M University, or Texas A&M Research Foundation.

It is recommended that reference to the whole or to part of this volume be made in one of the following forms, as appropriate:

Tamaki, K., Suyehiro, K., Allan, J., McWilliams, M., et al., 1992. *Proc. ODP, Sci. Results*, 127/128, Pt. 2: College Station, TX (Ocean Drilling Program).

Bristow, J. F., and deMenocal, P. B., 1992. Evaluation of quality of geochemical log data in ODP Hole 798B. In Tamaki, K., Suyehiro, K., Allan, J., McWilliams, M., et al., 1992. *Proc. ODP, Sci. Results*, 127/128, Pt. 2: College Station, TX (Ocean Drilling Program), 1021–1036.

Effective Publication Dates of ODP *Proceedings*

According to the International Code of Zoological Nomenclature, the date of publication of a work and of a contained name or statement affecting nomenclature is the date on which the publication was mailed to subscribers, placed on sale, or when the whole edition is distributed free of charge, mailed to institutions and individuals to whom free copies are distributed. The mailing date, *not the printed date*, is the correct one.

The mailing dates of recent *Proceedings of the Ocean Drilling Program* are as follows:

Volume 135 (*Initial Reports*): May 1992
Volumes 136/137 (*Initial Reports*): January 1992
Volume 138 (*Initial Reports*): August 1992
Volume 124 (*Scientific Results*): September 1991
Volume 125 (*Scientific Results*): July 1992
Volume 126 (*Scientific Results*): August 1992

Distribution

Copies of this publication may be obtained from Publications Distribution Center, Ocean Drilling Program, 1000 Discovery Drive, College Station, Texas 77845-9547. Orders for copies will require advance payment. See current ODP publication list for price and availability of this publication.

Printed September 1992

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences—Permanence of Paper for Printed Library Materials, ANSI Z39.48-1984[∞]™

TABLE OF CONTENTS

VOLUME 127/128—SCIENTIFIC RESULTS (PART 2)

(Synthesis papers are located in Part 2, irrespective of subject matter)

SECTION 6: PETROLOGY

47. Geochemistry and isotopic composition of volcanic rocks from the Yamato Basin:
Hole 794D, Sea of Japan 779
A. Pouclet and H. Bellon
48. Volcanic ash layers in the Japan Sea: tephrochronology of Sites 798 and 799 791
A. Pouclet and S. D. Scott
49. A Pb, Sr, and Nd isotopic study of basaltic rocks from the Sea of Japan, Legs 127/128 805
B. L. Cousens and J. F. Allan
50. ^{40}Ar - ^{39}Ar analysis of volcanic rocks recovered from the Japan Sea floor: constraints on the
age of formation of the Japan Sea 819
I. Kaneoka, Y. Takigami, N. Takaoka, S. Yamashita, and K. Tamaki
51. Cr-Spinel as a petrogenetic indicator: deducing magma composition from spinels in highly
altered basalts from the Japan Sea, Sites 794 and 797 837
J. F. Allan
52. Phenocryst and groundmass phase compositions of basaltic and andesitic sills and flows
from the Japan Sea recovered during Legs 127 and 128 849
P. Thy
53. Low-pressure melting relations of a basalt from Hole 797C in the Yamato Basin
of the Japan Sea 861
P. Thy
54. Liquid lines of descent of basalts drilled at Sites 794 and 797 in the Yamato Basin
of the Japan Sea 869
P. Thy
55. Preliminary results on the mineralogy and geochemistry of basalt alteration, Hole 794D 883
D. Proust, A. Meunier, A. M. Fouillac, P. Dudoignon, A. Sturz, J. Charvet, and S. D. Scott
56. Experimental petrology of basement basaltic rocks from Sites 794 and 797, Japan Sea 891
S. Yamashita and T. Fujii
57. Nd and Sr isotopic study of Leg 127 basalts: implications for the evolution of the Japan Sea
Backarc Basin 899
S. Nohda, Y. Tatsumi, S. Yamashita, and T. Fujii
58. Geochemistry of igneous rocks from Legs 127 and 128, Sea of Japan 905
J. F. Allan and M. P. Gorton

SECTION 7: PALEOMAGNETICS

59. Magnetic properties and paleomagnetism of volcanic rocks and interlayered sediments
from the Japan Sea (ODP Leg 127) 933
L. Vigliotti

60. Rock magnetic properties of sediments from Site 797, Japan Sea	947
M. Torii, A. Hayashida, L. Vigliotti, and J. Wipperfurth	
61. Magnetic intensity variations in sediment cores from Leg 128	959
Y. Hamano and K.A.O. Krumsiek	
62. Pliocene-Pleistocene magnetostratigraphy of sediment cores from the Japan Sea	969
Y. Hamano, K.A.O. Krumsiek, L. Vigliotti, and J.J.M. Wipperfurth	

SECTION 8: GEOPHYSICS

63. Identification and correction of a systematic error in index property measurements	985
D. C. Nobes, M. G. Langseth, S. Kuramoto, and P. Holler	
64. Effect of hydrostatic pressure on the thermal conductivity of suboceanic materials recovered during Leg 128, Japan Sea	1017
H. Kinoshita	
65. Evaluation of quality of geochemical log data in ODP Hole 798B	1021
J. F. Bristow and P. B. deMenocal	
66. Evidence for late Miocene cyclicity and broad-scale uniformity of sedimentation in the Yamato Basin, Sea of Japan, from formation microscanner data	1037
J. A. Meredith and R. Tada	
67. Estimating <i>in-situ</i> stress field from basaltic rock core samples of Hole 794C, Yamato Basin, Japan Sea	1047
K. Tamaki and K. Yamamoto	
68. Broadband downhole digital seismometer experiment at Site 794: a technical paper	1061
K. Suyehiro, T. Kanazawa, N. Hirata, M. Shinohara, and H. Kinoshita	
69. Detailed crustal structure of Northern Yamato Basin	1075
M. Shinohara, N. Hirata, H. Nambu, K. Suyehiro, T. Kanazawa, and H. Kinoshita	
70. Seismic evidence of anisotropy in the Yamato Basin crust	1107
N. Hirata, H. Nambu, M. Shinohara, and K. Suyehiro	
71. Consolidation characteristics and permeabilities of sediments from the Japan Sea (Sites 798 and 799)	1123
P. R. Holler	
72. Seismic stratigraphy of the Kita-Yamato Trough	1135
P. R. Holler and K. Suyehiro	
73. Can Opal-A/Opal-CT BSR be an indicator of the thermal structure of the Yamato Basin, Japan Sea?	1145
S. Kuramoto, K. Tamaki, M. G. Langseth, D. C. Nobes, H. Tokuyama, K. A. Pisciotta, and A. Taira	
74. Performance of the ocean broadband downhole seismometer at Site 794	1157
T. Kanazawa, K. Suyehiro, N. Hirata, and M. Shinohara	

SECTION 9: TECTONICS

75. Structural features in Leg 128 cores: relationship with the tectonic evolution of the Japan Sea	1175
J. Charvet, K. Grimm, J. Griffin, L. Jolivet, A. Poulet, and D. Panis	

SECTION 10: SYNTHESSES

76. Subsidence of the Japan Sea: stratigraphic evidence from ODP sites and onshore sections 1197
J. C. Ingle, Jr.
77. Biostratigraphic and biochronologic synthesis of Legs 127 and 128: Sea of Japan 1219
L. H. Burckle, C. A. Brunner, J. Alexandrovich, P. deMenocal, J. Briscoe, Y. Hamano, L. Heusser,
J. C. Ingle, Jr., T. Kheradyyar, I. Koizumi, K.A.O. Krumsiek, H.-Y. Ling, J. P. Muza, A. Rahman,
A. Sturz, L. Vigliotti, L. D. White, J.J.M. Wipperm, and T. Yamanoi
78. Lithostratigraphy and compositional variation of Neogene hemipelagic sediments
in the Japan Sea 1229
R. Tada and A. Iijima
79. Diagenetic reactions in deeply buried sediments of the Japan Sea: a synthesis of interstitial-
water chemistry results from Leg 127 and Leg 128 1261
R. W. Murray, H.-J. Brumsack, M. T. von Breyman, A. A. Sturz, R. B. Dunbar, and J. M. Gieskes
80. Comparison and correlation of physical-property results from Japan Sea Basin and Rise Sites,
Legs 127 and 128 1275
D. C. Nobes, M. G. Langseth, S. Kuramoto, P. Holler, and N. Hirata
81. Geothermal measurements: thermal evolution of the Japan Sea basins and sediments 1297
M. G. Langseth and K. Tamaki
82. Neogene kinematics in the Japan Sea region and volcanic activity of the Northeast Japan Arc . 1311
L. Jolivet and K. Tamaki
83. Tectonic synthesis and implications of Japan Sea ODP drilling 1333
K. Tamaki, K. Suyehiro, J. Allan, J. C. Ingle, Jr., and K. A. Pisciotto

SECTION 11: DATA REPORTS

84. *Data Report*: Electrical resistivity experiment in the Yamato Basin 1351
Y. Hamano, H. Utada, and K. Becker
85. *Data Report*: Pliocene-Pleistocene-Holocene trace metal data from Holes 794A, 795A,
797A, and 797B 1361
A. Cramp and C. Lewis
86. *Data Report*: Uranium, thorium, and other trace elements in strip samples from Cores
128-798B-13H through -15H 1367
C. M. Isaacs
87. *Data Report*: Geochemistry and mineralogy of ash layers from Legs 127 and 128
in the Japan Sea 1373
A. Pouclet, K. Fujioka, T. Furuta, and S. Ogihara
88. *Data Report*: Geochemical logging results from the Sea of Japan: Sites 798 and 799 1395
J. F. Bristow, C. Broglia, P. B. deMenocal, and E. L. Pratson
89. *Data Report*: Results of geochemical well logging in the Japan Sea, Sites 794, 796, and 797,
Leg 127 1411
E. L. Pratson, C. Broglia, R. Schaar, J. A. Meredith, and R. W. Murray

SECTION 12: POLICY

- JOIDES Advisory Groups 1431
- Sample-Distribution Policy 1435

SECTION 13: INDEX

Index 1439

Back-Pocket Microfiche*

Chapter 63:

Appendix A. Index Property Errors and Wet Volume Adjustment for Leg 127.

Appendix B. Index Property Errors and Wet Volume Adjustment for Leg 128.

Chapter 87:

Table 2. Numbering of samples and main petrographic and mineralogical features.

Table 3. Chemical analyses and modal compositions of glasses (electron microprobe).

Table 4. Analyses of trace elements of selected samples (inductively coupled plasma spectrometer).

Table 5. X-ray powder data for barite and harmotome.

Table 6. Nomenclature and relative percentage of petrographic types for compositional groups.

Table 7. Selected chemical analyses and structural features of magmatic minerals (electron microprobe).

*Back-pocket foldout and microfiche are found in the back of Part 2.
