

TABLE OF CONTENTS

VOLUME 156—SCIENTIFIC RESULTS

SECTION 1: SEDIMENTOLOGY

1. Clay mineralogy and clay geochemistry in the vicinity of the décollement zone, northern Barbados Ridge 3
M.B. Underwood and X. Deng

SECTION 2: BIOSTRATIGRAPHY

2. Miocene radiolarian biostratigraphy of the décollement zone (northern Barbados Ridge) 33
T. Steiger
3. Calcareous nannofossils from Leg 156, northern Barbados Ridge complex 49
Y. Xu and S.W. Wise, Jr.

SECTION 3: STRUCTURAL GEOLOGY

4. Scaly fabrics in sheared clays from the décollement zone of the Barbados accretionary prism 59
P. Labaume, A.J. Maltman, A. Bolton, D. Tessier, Y. Ogawa, and S. Takizawa
5. Carbonate veins from the décollement zone at the toe of the northern Barbados accretionary prism: microstructure, mineralogy, geochemistry, and relations with prism structures and fluid regime 79
P. Labaume, M. Kastner, A. Trave, and P. Henry
6. Magnetic anisotropy of Barbados prism sediments 97
B.A. Housen

SECTION 4: PHYSICAL PROPERTIES

7. Permeability and consolidation characteristics from Hole 949B, northern Barbados Ridge 109
W. Brückmann, K. Moran, and A.K. MacKillop
8. Directional properties of *P*-wave velocities and acoustic anisotropy in different structural domains of the northern Barbados Ridge accretionary complex 115
W. Brückmann, K. Moran, and B.A. Housen
9. Variations in ultrasonic velocity and density with pore pressure in the décollement zone, northern Barbados Ridge accretionary prism 125
H.J. Tobin and J.C. Moore
10. Relationship between porosity, electrical conductivity, and cation exchange capacity in Barbados wedge sediments 137
P. Henry
11. Computed tomography scan image analysis of sediments 151
J. Ashi

SECTION 5: GEOCHEMISTRY

12. Pore-fluid trace metal concentrations: implications for fluid/rock interactions in the Barbados accretionary prism. 163
Y. Zheng and M. Kastner
13. Geochemistry of sediments and authigenic minerals in and around the décollement zone of the northern Barbados Ridge accretionary prism 171
T. Ito, K. Yamaguchi, K. Komuro, and Y. Ogawa
14. Analysis of natural gamma-ray spectra obtained from sediment cores with the shipboard scintillation detector of the Ocean Drilling Program: example from Leg 156. 183
P. Blum, A. Rabaute, P. Gaudon, and J.F. Allan

SECTION 6: DOWNHOLE MEASUREMENTS AND LOGGING

15. Packer experiments along the décollement of the Barbados accretionary complex: measurements of in situ permeability 199
A.T. Fisher and G. Zwart
16. Interpretation of Site 948 logging-while-drilling data: mineralogical inversion of log data constrained by sample analyses 219
M.J. Jurado and B. Alonso
17. Estimated fluid pressures of the Barbados accretionary prism and adjacent sediments. 229
J.C. Moore and H. Tobin
18. Long-term observations of pressure and temperature in Hole 948D, Barbados accretionary prism 239
J.-P. Foucher, P. Henry, and F. Harmegnies
19. The CORK experiment in Hole 949C: long-term observations of pressure and temperature in the Barbados accretionary prism 247
K. Becker, A.T. Fisher, and E.E. Davis

SECTION 7: GEOPHYSICS

20. Integration of vertical seismic profiling, logging, and seismic data in the vicinity of the décollement, northern Barbados Ridge accretionary prism 255
G.F. Moore, Z. Zhao, and T.H. Shipley
21. Seismic velocities in the northern Barbados Ridge accretionary complex, Site 949 263
S. Peacock, G.K. Westbrook, and D.P. Graham

SECTION 8: SYNTHESIS PAPERS

22. Structural geology of the décollement at the toe of the Barbados accretionary prism 279
A. Maltman, P. Labaume, and B. Housen
23. Synthesis of the Barbados décollement seismic reflection response from drilling-based geophysical observations and physical properties. 293
T.H. Shipley, G.F. Moore, H.J. Tobin, and J. Casey Moore
24. Evaluation of hydrogeologic properties of the Barbados accretionary prism: a synthesis of Leg 156 results 303
G. Zwart, W. Brückmann, K. Moran, A.K. MacKillop, A.J. Maltman, A. Bolton, P. Vrolijk, T. Miller, M.J. Gooch, and A. Fisher

25. Geochemistry of fluids and flow regime in the décollement zone at the northern Barbados Ridge	311
M. Kastner, Y. Zheng, T. Laier, W. Jenkins, and T. Ito	
26. Comparative logging results in clay-rich lithologies on the Barbados Ridge	321
M.J. Jurado, J.C. Moore, and D. Goldberg	

SECTION 9: DATA REPORTS

27. <i>Data Report: Grain-size analysis of sediments from the northern Barbados accretionary prism</i>	337
A. Meyer and A. Fisher	
28. <i>Data Report: Phase chemistry of volcanic ash from Site 949</i>	343
P.A. Cawood and E.C. Leitch	
29. <i>Data Report: chemical and isotopic composition of pore fluids in accreted and underthrust sediments of the northern Barbados Ridge</i>	353
M. Kastner and Y. Zheng	

SECTION 10: INDEX

30. Index	359
(For JOIDES Advisory Groups and ODP Sample and Data Distribution Policy, please see ODP Proceedings, Scientific Results, Volume 148, pp.491–500.)	

CD-ROM MATERIALS

The “*Proceedings, Scientific Results and Initial Reports*” CD-ROM contains an electronic version of the Leg 156 *Scientific Results* volume in Adobe Acrobat. The volume can only be viewed with Adobe Acrobat software and is designed for Acrobat Reader version 3. This software is supplied on the CD.

There are three starting points for this CD:

README.TXT is an ASCII file that explains how to install Adobe Acrobat on any of the available platforms. This file is in the root directory.

README.PDF is an Acrobat file that contains information about the CD and lists available files and how to use them. This file is in the root directory.

156SR.PDF lists the table of contents for the volume and contains links to the volume chapters. This file is in the VOLUME directory.

PROCEEDINGS, SCIENTIFIC RESULTS CD

Directory Structure:

README.TXT (readme file for Acrobat Reader)
 README.PDF (readme file for Leg 156 *Scientific Results* volume)
 NDX_READ.PDF (readme file for Compiled Electronic Index of the *Proceedings of the Ocean Drilling Program*)
 ACROBAT (Acrobat software)
