

Structural Geology Description

Leg	Hole	Core	Section	Observer
169	1035H	9	1	MAIR

Hydraulic breccia unit w/ variable amounts of sulfide alteration

1
2
3
4 Massive sulfide Po Sph
minor Cpy

5 Fe rich
fine grained black sphalerite

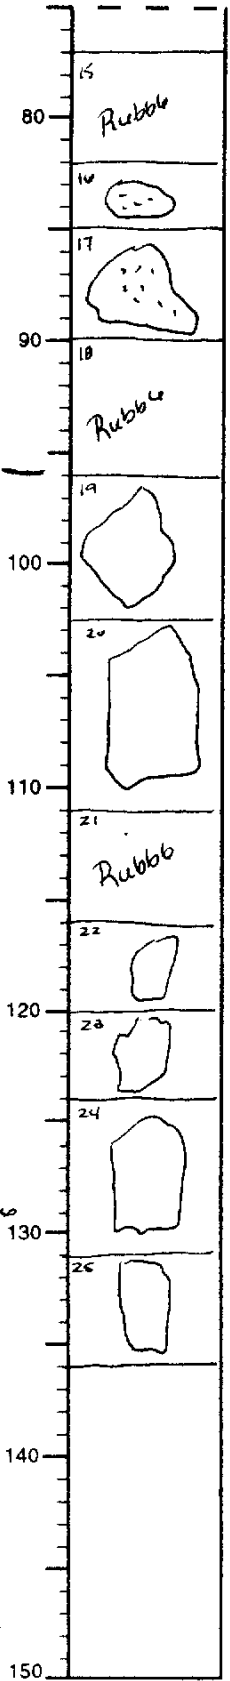

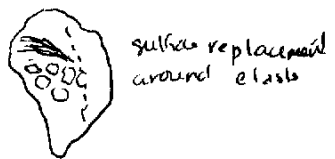

6 Massive sulfide Po Sph
minor Cpy

7 Massive sulfide w/ a few
mud clasts left

8 massive sulfide
Cpy to Sph

9 massive sulphide
predomin Cpy w/ minor Po
a few mud clasts left

10
11 Original bedding still visible
Po replacement
around clasts and possible
or. bioherms

15
80 Rubble

16 minor sulfide alt. around clast

17 minor sulfide alt. around clast
