

# Structural Geology Description

Leg	Hole	Core	Section	Observer
169	856H	27R	1	MAR

PO + hematite  
phyr + magnetite  
84/090 82/180

PO  
unoriented piece

finely bedded  
siltstone

finely bedded siltstone  
w/ PO [ ] along  
laminae

PO veins anastomosing  
through bed

fracture undetermined  
offset via w/ PO  
04/090 00/000

B 44/090 32/000  
1mm

PO controlled by lam  
fine grained siltstone  
2mm

PO 1mm  
07/270 04/180

> change to coarser  
grained ~~at~~ down core

PO vein 3-4mm

Lithology: siltstone  
w/ inter bedding
