VISUAL CORE DESCRIPTION

SEDIMENTS / SEDIMENTARY ROCKS

SECTION DESCRIPTION

OBSERVER
WDG

Moderately indurated greenish gy  
silty clay with minor interbeds of  
med gy (NS) fine grained sand  
(terrestrial). Core is mottled due  
presumably to hydro thermal  
alteration. Patches of greenish-  
gy ~~also~~ sediment also occurs  
throughout the section.

SG 5/1  
to  
SG 5/1

Carbonate worm burrow  
concretions with pyrite
