VISUAL CORE DESCRIPTION

SEDIMENTS / SEDIMENTARY ROCKS

SECTION DESCRIPTION

Dark gray (N4/)  
SULFIDE SAND (20-30% sulfide)  
 laminations in a gray  
 (N5/) SILTY CLAY.

Disseminated sulfide & minor disseminated pyrite are present below ~50cm.

The SULFIDE SANDS exhibit parallel laminations, sharp bases, & local fining-upward!

Inclined laminations at 90-93cm may indicate slumping
