SEDIMENTS / SEDIMENTARY ROCKS

SECTION DESCRIPTION

Pieces 1-8, except 7: Bluish gray (SB s/1) to Pale green (SG 7/2) siltstone, locally with planar lamination. 0.1-10mm veins and ^{and nodules} pyrochite. Total about 10% sulholes. Small blebs of a very green soft mineral, probably some kind of zeolite or clay mineral.

7: Massive pyrite-chalcopyrite-sphalerite. (probably switched with piece 8 (cfr. core 15)). Some anhydrite. 80% sphalerite, 10% chalcopyrite, 10% pyrite.
