VISUAL CORE DESCRIPTION

SEDIMENTS / SEDIMENTARY ROCKS

SECTION DESCRIPTION

Soupy poorly sorted
gray sands
(Grain size from silt to coarse
sand)

Blebs of gray fine grained mud
mixed with sand by drilling
disturbance

One block silty-sandy chip
(3 x 5 cm) of sulfide grains
and other Quartz + feldspar grains

Fine disseminated sulfide
grains (small sized) throughout

Sands contain grains of
glass & ~~silica~~ ^{mica} and
coarser (out of size: up to 1-2
mm) clay aggregates (milky color)
(zeolites?)
