

STRUCTURAL GEOLOGY DESCRIPTION

Leg	Hole	Core	Section	Observer
173	1068 ft	24R	2	MR

Black serpentine
relict pyroxene

V - green (light) serpentine
veins.

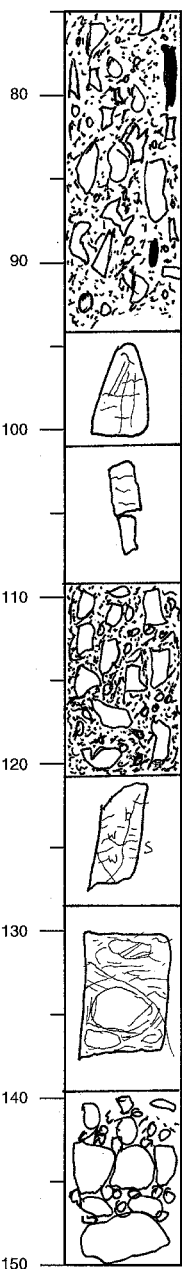

V = 138/54

V - blue-green veins
(one dark serpentine vein)

S - foliation in peridotite

V = 090/66

V = 541/50

White veins - thin, subhorizontal
Black seip. veins - steep
(white cuts black)

white seip. veins.

Black cut by white
S - foliation in peridotite

mainly white, some green seip
veins - axial, missing, interconnected
Compacted core catches
