

ODP Proceedings, Initial Reports, Volume 180: Chapter 2, Figure F8.
 Site survey multichannel seismic (MCS) data showing the positions of sites drilled. The data are presented as migrated time sections. Lines 1369 and 1374 are also presented as migrated depth sections. The inset shows the location of the MCS lines on a bathymetric base contoured every 200 m and labeled in km. Bold numbers indicate the sites and bold italic numbers indicate the MSC lines. Common depth points (CDP) are annotated every 1000 on the inset and every 100 above the MCS data. MS = Moresby Seamount, N = Normanby Island.
