PROCEEDINGS OF THE
OCEAN DRILLING PROGRAM

Prepared by the
OCEAN DRILLING PROGRAM,
TEXAS A&M UNIVERSITY,
in cooperation with the
NATIONAL SCIENCE FOUNDATION
and
JOINT OCEANOGRAPHIC INSTITUTIONS, INC.
PROCEEDINGS OF THE OCEAN DRILLING PROGRAM

Volume 204
Initial Reports
Drilling Gas Hydrates on Hydrate Ridge, Cascadia Continental Margin

Covering Leg 204 of the cruises of the Drilling Vessel JOIDES Resolution
Victoria, British Columbia, Canada, to Victoria, British Columbia, Canada
Sites 1244–1252
7 July–2 September 2002

SHIPBOARD SCIENTISTS
Anne M. Tréhu, Gerhard Bohrmann, Frank R. Rack, Marta E. Torres,
Nathan L. Bangs, Samantha R. Barr, Walter S. Borowski, George E. Claypool, Timothy S. Collett,
Mark E. Delwiche, Gerald R. Dickens, David S. Goldberg, Eulàlia Gràcia, Gilles Guèrin,
Melanie Holland, Joel E. Johnson, Young-Joo Lee, Char-Shine Liu, Philip E. Long, Alexei V. Milkov,
Michael Riedel, Peter Schultheiss, Xin Su, Barbara Teichert, Hitoshi Tomaru, Maarten Vanneste,
Mahito Watanabe, Jill L. Weinberger

SHIPBOARD STAFF SCIENTIST
Frank R. Rack

SHORE-BASED STAFF SCIENTIST
Marta E. Torres

VOLUME EDITOR

**CD-ROM chapter citation:**

This volume also appears on the World Wide Web. See [www-odp.tamu.edu/publications](http://www-odp.tamu.edu/publications) for available volumes and Web citation formats.
Effective publication dates of ODP Proceedings

According to the International Code of Zoological Nomenclature, the date of publication of a work and of a contained name or statement affecting nomenclature is the date on which the publication was mailed to subscribers, placed on sale, or when the whole edition is distributed free of charge, mailed to institutions and individuals to whom free copies are distributed. The mailing date, not the printing date, is the correct one.

The printing date of this volume: November 2003

The mailing dates of recent Proceedings of the Ocean Drilling Program:
Volume 201 (Initial Reports): May 2003
Volume 203 (Initial Reports): June 2003
Volume 177 (Scientific Results): March 2003
Volume 183 (Scientific Results): June 2003
Volume 186 (Scientific Results): October 2003

Copies of this publication may be obtained from Publications Distribution Center, Ocean Drilling Program, Texas A&M University, 1000 Discovery Drive, College Station TX 77845-9547, USA. See the ODP publication list at www-odp.tamu.edu/publications or contact ODP for prices and ordering information. Orders for copies require advance payment.

PUBLISHER’S NOTES

This volume also appears on the World Wide Web. Any scientific corrections, revisions, or additions will be noted in the chapter (see “Chapter Notes”) at www-odp.tamu.edu/publications.

This publication was prepared by the Ocean Drilling Program, Texas A&M University, as an account of work performed under the international Ocean Drilling Program, which is managed by Joint Oceanographic Institutions, Inc., under contract with the National Science Foundation. Funding for the program was provided by the following agencies at the time of this cruise:

Australia/Canada/Chinese Taipei/Korea Consortium for Ocean Drilling: Department of Primary Industries and Energy (Australia), Natural Resources Canada, National Taiwan University in Taipei, and Korean Institute for Geology, Mining and Minerals

Deutsche Forschungsgemeinschaft (Federal Republic of Germany)

European Science Foundation Consortium for Ocean Drilling (Belgium, Denmark, Finland, Iceland, Ireland, Italy, The Netherlands, Norway, Portugal, Spain, Sweden, and Switzerland)

Institut National des Sciences de l’Univers–Centre National de la Recherche Scientifique (INSU-CNRS) (France)

Marine High-Technology Bureau of the State Science and Technology Commission of the People’s Republic of China

National Science Foundation (United States)

Natural Environment Research Council (United Kingdom)

University of Tokyo, Ocean Research Institute (Japan)
Any opinions, findings, and conclusions or recommendations expressed in this publication are those of the author(s) and do not necessarily reflect the views of the National Science Foundation, the participating agencies, Joint Oceanographic Institutions, Inc., Texas A&M University, or Texas A&M Research Foundation.

Abbreviations for names of organizations and publications in ODP reference lists follow the style given in *Chemical Abstracts Service Source Index* (published by American Chemical Society).

The bulk of the shipboard-collected data from this leg is available on the World Wide Web and is accessible at [www-odp.tamu.edu/database](http://www-odp.tamu.edu/database). If you cannot access this site or need additional data, please contact the ODP Data Librarian, Ocean Drilling Program, Texas A&M University, College Station TX 77845-9547, USA. E-mail: database@odpemail.tamu.edu.

Some close-up photographs of very dark cores have been tonally enhanced to better illustrate particular features of interest.

A site map showing the drilling locations for this leg and maps showing the drilling locations of all Ocean Drilling Program (ODP) and Deep Sea Drilling Project (DSDP) drilling sites are available on the volume CD-ROM in PDF format. These maps were produced using Generic Mapping Tools (GMT) of Paul Wessel and Walter H.F. Smith ([gmt.soest.hawaii.edu](http://gmt.soest.hawaii.edu)).

The cover photograph shows a sample of gas hydrate recovered from 2.69 meters below seafloor near the summit of Hydrate Ridge during Leg 204 (Sample 204-1250D-1H-CC, 12–14 cm). It illustrates one of the many different types of hydrate fabric observed during Leg 204. In this sample, horizontal layering probably reflects in situ hydrate formation parallel to the bedding. Vertical sediment-filled cracks likely reflect disruption caused by drilling. The photograph is by ODP Photographer John Beck.
FOREWORD

BY JOINT OCEANOGRAPHIC INSTITUTIONS, INC.

This volume presents scientific and engineering results from the Ocean Drilling Program (ODP). These results address the scientific and technical goals of the program, which are focused on the study of the dynamics of Earth’s interior and environment, the evolution of oceanic crust, and the fluctuations of climate. In addition, study of the Earth’s deep biosphere is an emergent research objective.

ODP, an international partnership of scientists and research institutions from 22 countries, operates the drillship JOIDES Resolution. This state-of-the-art research vessel contains eight levels of laboratories and other scientific facilities required for carrying out the program’s objectives.

The management of ODP involves a partnership of scientists and governments. International oversight and coordination are provided by the ODP Council, which is made up of representatives from the member countries. Overall scientific and management guidance is provided by representatives from the Joint Oceanographic Institutions for Deep Earth Sampling (JOIDES).

Joint Oceanographic Institutions, Inc. (JOI), a nonprofit consortium of 18 U.S. oceanographic institutions, serves as the National Science Foundation’s prime contractor for ODP. JOI implements scientific objectives, plans, and recommendations of the JOIDES committees through major subcontracts to Texas A&M University (TAMU) for science operations and to Lamont-Doherty Earth Observatory (LDEO) of Columbia University for geochemical and geophysical well-logging services.

JOI, TAMU, and LDEO have worked together successfully for many years to manage the Ocean Drilling Program. We look forward to many exciting discoveries and continued international collaboration as we further our scientific mission, especially the planning for the future of ocean drilling beyond 2003.

ACKNOWLEDGMENTS

The Ocean Drilling Program (ODP) Leg 204 Scientific Party wishes to thank everyone who sailed aboard the JOIDES Resolution for making the cruise so successful and enjoyable. Our particular thanks go to Captain Peter Mowat, Drilling Superintendent Tim McCown, and ODP Operations Manager Mike Storms.

We recognize that several aspects of the logistics of this leg—almost no transit to, from, and between sites; the difficulties in handling and processing gas hydrate samples quickly; the amount and complexity of new instrumentation brought in for this leg; and the record-keeping complications caused by returning to sites multiple times—presented significant challenges to the personnel, supplies, and data handling on board. We thank the ODP staff and the crew of the JOIDES Resolution for responding to these challenges with efficiency and good humor. We are also grateful to the Catermar crew for ensuring a pleasant working environment.

The co-chief scientists would like to thank all the shipboard scientists, who worked so hard to make the leg a success. George Claypool deserves special mention for bringing his long-term expertise on methane in the seafloor and on issues related to drilling safety in this environment. We thank the ODP publications staff for their skill, patience, and hard work in producing this volume.

We wish to acknowledge the financial and logistical support from the many member countries of the Ocean Drilling Program. In addition, this cruise benefitted from support for new technologies from the U.S. Department of Energy and the European Union–funded HYACINTH program. The U.S. National Science Foundation and the NOAA Underwater Research Program provided support for essential precruise site survey data.

Finally, we thank Vern Kulm and Erwin Suess for their pioneering research on the vent systems of Cascadia.

CD-ROM CONTENTS: ASCII TABLES

This CD-ROM contains ASCII versions of all of the smear slide data tables presented under “Core Descriptions.” A complete listing of the ASCII tables can be found listed below.

You can access these data directly from the PDF files. Depending on your computer platform, the following information applies.

PC COMPUTERS
By default, double-clicking on a filename with a .TXT extension will launch the Notepad application. You can configure your computer’s operating system so that files on this CD with .TXT extensions automatically open in other software, such as Microsoft Excel. Follow these steps from the pull-down menu: Windows 95 and NT operating systems: View > Options > File Types; and Windows 98, 2000, ME, and XP systems: View > Folder Options > File Types.

MACINTOSH COMPUTERS
All table files with .TXT extensions will automatically open into Excel. If you do not have Excel installed on your computer, you may view these files through other spreadsheet or text-editor programs. Open the application of your choice, select File > Open, and open the ASCII file.

UNIX COMPUTERS
You can open files with .TXT extensions in any text editor or spreadsheet program but not directly from PDF files.

**CD-ROM CONTENTS: DRILLING LOCATION MAPS**

A site map showing the drilling locations for this leg and maps showing the drilling locations of all Ocean Drilling Program (ODP) and Deep Sea Drilling Project (DSDP) drilling sites are available in PDF format.

- **ODP Leg 204 Site Map**
- **ODP Map** (Legs 100–204)
- **DSDP Map** (Legs 1–96)
RELATED LEG DATA

DOWNHOLE LOGGING AND CORE DATA

A CD-ROM containing processed logging data and a subset of core data is included with the printed version of this volume. However, a more complete set of the logging data collected by ODP Logging Services is available online at www.ldeo.columbia.edu/BRG/ODP/DATABASE/DATA/search.html. If you have problems downloading the data, wish to receive additional logging data, or have questions regarding the data, please contact: Data Services Manager, ODP Logging Services, Borehole Research Group, Lamont-Doherty Earth Observatory of Columbia University, PO Box 1000, 61 Route 9W, Palisades NY 10964, USA; Tel: (845) 365-8343; Fax: (845) 365-3182; E-mail: logdb@ldeo.columbia.edu.

The majority of the core data on the CD are available on the Web at www.odp.tamu.edu/database. If you cannot access the ODP database or need additional data, please contact: ODP Data Librarian, Ocean Drilling Program, Texas A&M University, 1000 Discovery Drive, College Station TX 77845-9547, USA; Tel: (979) 845-8495; Fax: (979) 458-1617; E-mail: database@odpemail.tamu.edu.
COMPILED ELECTRONIC INDEX

The Compiled Electronic Index of the *Proceedings of the Ocean Drilling Program* included on the volume CD-ROM contains individual indexes of Volumes 101–178, 180, 183, and 186. The indexes are contained in the directory titled ODPINDEX and are named ###NDX.PDF (### = the leg number). These indexes can be searched individually or collectively.
