

INDEX TO VOLUME 113

This index provides coverage for both the *Initial Reports* and *Scientific Results* portions of Volume 113 of the *Proceedings of the Ocean Drilling Program*. Index entries with the suffix *a* refer to pages in the *Initial Reports*, and those with *b*, to pages in the *Scientific Results* (this book).

The index is presented in three parts: (1) a Subject Index, (2) a Site Index, and (3) a Paleontological Index. In addition to this printed version, the index is also available in the form of a machine-readable, ASCII-encoded, 9-track magnetic tape, 1600 bpi.

The index was prepared by Wm. J. Richardson Associates, Inc., under subcontract to the Ocean Drilling Program. It follows the concept developed by the Deep Sea Drilling Project at Scripps Institution of Oceanography for a comprehensive, cumulative index of DSDP volumes. Both of these indexes are based on a hierarchy of entries: (1) a main entry, defined as a key word or concept followed by a reference to the page on which that word or concept appears; (2) a subentry, defined as a further elaboration on the main entry followed by a page reference; and (3) a sub-subentry, defined as an even further elaboration on the main entry or subentry followed by a page reference.

The Subject Index follows a standard format. Geographic and individual names are referenced in the index only if they are subjects of discussion. This index also includes broad fossil groups, such as foraminifers and radiolarians, which also appear in the Paleontological Index.

The Site Index is structured to contain entries for the sites discussed in the volume. Site entries are modified by subject subentries.

The Paleontological Index is an index relating to significant findings and/or substantive discussions, not of species names *per se*. This index covers three varieties of information: (1) broad fossil groups, including individual genera and species that have been erected or emended formally; (2) biostratigraphic zones; and (3) fossils depicted in illustrations.

The indexes cover text figures and tables but not core description forms ("barrel sheets") or core photographs. Also excluded are bibliographic references, names of individuals, and routine front and back matter.

For further information, contact the Chief Production Editor, Ocean Drilling Program, 1000 Discovery Drive, College Station, Texas 77845-9547.

SUBJECT INDEX

- Acoustic basement, South Orkney microcontinent: Site 696, location, 28b
- Agulhas Plateau, Maestrichtian water temperatures, 821b
- Alaska, glacial diamictites, 953b
- Alkalinity
Dronning Maud Land margin: Site 693, 374a-375a
depth and, 138b, 141b, 380a
- Jane Basin, 730a, 735a
depth and, 140b, 143b, 736a-737a
- Maud Rise: Site 689, depth and, 129a-130a, 138b, 140b
- Maud Rise: Site 690, 230a
depth and, 138b, 141b, 237a
- South Orkney microcontinent: Site 695, 560a
depth and, 139b, 142b, 561a-562a
- South Orkney microcontinent: Site 696, 647a
depth and, 139b, 143b, 650a-651a
- Weddell Basin: Site 694, depth and, 139b, 142b
- Alkane, Weddell Sea, 201b-202b, 206b
- Alteration
benthic foraminiferal isotope record and, 836b
volcanic ash, 144b
See also Calcite
- Alteration, volcanic
clay, 53b
interstitial-water chemistry and, 140b-145b
- Ammonia concentrations
Dronning Maud Land margin: Site 693, 375a
depth and, 380a
- Jane Basin, depth and, 735a-737a
- Maud Rise: Site 690, 230a
depth and, 237a
- South Orkney microcontinent: Site 695, depth and, 561a-562a
- South Orkney microcontinent: Site 696, 647a-648a
depth and, 650a-651a
- Weddell Basin: Site 694, 484a
depth and, 485a-486a
- Ammonium, as evidence of production rates, 889b
- Amphibole
Dronning Maud Land margin: Site 693, dating, 55b
- Jane Basin, dating, 62b, 63b
- Maud Rise: Site 690, dating, 58b
- South Orkney microcontinent: Site 696
dating, 61b
depth and, 30b
peak areas and heights, 29b
- Weddell Basin: Site 694, dating, 59b
- Anoxia, cyclic, Cretaceous, 195b
- Antarctic Bottom Water (AABW), 122b, 938b
in Jane Basin, 803b
Jane Basin area, 111b
Maud Rise area, 865b-866b
See also Proto-AABW
- Antarctic Circumpolar Current
development of, 65b, 938b, 952b
initiation of, 803b
- Antarctic margin
glaciation, 385a
location, 122b
morphology, 43b
three-dimensional view, 43b
- Antarctic margin E
geologic provinces, 90b
glaciation, 658a
- ice sheets, development, 462a, 489a, 955b
as source of quartz sand, 98b-99b
- Antarctic margin W
geologic provinces, 90b
glaciation, 658a-659a
ice sheets, 892b
development, 462a, 489a-490a
geochemical signals of formation, 881b
- Antarctic Ocean
climatic change before Cretaceous/Tertiary boundary, 842b
as CO₂ sink, 127b
drill sites, 902b
- Miocene cooling, isotope changes and, 890b
- planktonic foraminiferal seasonal succession, Paleogene, 850b
- sea-ice formation, in Oligocene, 875b
- seasonal thermocline
Cretaceous changes, 941b
Eocene, 948b
Paleocene-Eocene changes, 861b-862b
- stable isotopes
benthic foraminiferal data, 865b
Paleogene anomalies, 875b-876b
- surface-water temperatures, 850b
Cretaceous, 843b, 844b
Cretaceous-Eocene, 937b
Eocene, 947b

Thalassiosira spumellaroides, Maud Rise: Site 690, 793b-794b, 801b
Thalassiosira spumellaroides Partial-Range Zone, 769b
Theocorys sp., Dronning Maud Land margin: Site 693, 357b, 361b
Tholoniid sp.
 Maud Rise: Site 689, 694b, 704b
 Maud Rise: Site 690, 694b
Thoracosphaera operculata, Maud Rise: Site 689, 540b-541b, 545b
Thoracosphaera sp.
 Maud Rise: Site 690, 531b
 abundance, 523b
Toweius crassus, Maud Rise: Site 690, 638b
Toweius craticulus, Maud Rise: Site 690, 637b
Toweius emimens, Maud Rise: Site 690, 637b
Toweius magnicrassus, Maud Rise: Site 690, 638b
Toweius tovae, Maud Rise: Site 690, 638b
Tribrachiatius
 Maud Rise: Site 689, 621b
 Maud Rise: Site 690, 621b
Tribrachiatius contortus, Maud Rise: Site 690, 638b
Tribrachiatius orthostylus, Maud Rise: Site 690, 638b
Tricolocapsa sp., Dronning Maud Land margin: Site 693, 357b, 362b
Tricolporopollenites sp., South Orkney microcontinent: Site 696, 609b-610b
 Triods, Maud Rise: Site 689, 965b, 969b
- Tripoporopollenites* sp., South Orkney microcontinent: Site 696, 608b
Trissocyclid sp.
 Maud Rise: Site 689, 695b, 705b
 Maud Rise: Site 690, 695b
Trochus elegantus n. sp., Dronning Maud Land margin: Site 693, 377b, 397b-398b
Tubodiscus verena, Dronning Maud Land margin: Site 692, 348b
Tubotuberella vlamingii, Dronning Maud Land margin: Site 692, 462b
Tubulifloridites antipodica
 South Orkney microcontinent: Site 696, 610b
 rare occurrence, 603b
Turrilina alsatica, Maud Rise: Site 690, 592b
 Tylostyles, South Orkney microcontinent: Site 695, 965b, 969b
- Vallacerta hannai*, Dronning Maud Land margin: Site 693, 433b, 441b-442b
Variramus
 Dronning Maud Land margin: Site 693, 432b, 435b-440b
Variramus aculeifera, Dronning Maud Land margin: Site 693, 432b, 435b-440b
Variramus loperi, Dronning Maud Land margin: Site 693, 432b-433b, 438b, 442b
Vekshinella guadraraculla, Dronning Maud Land margin: Site 692, 346b
Vekshinella sp., Dronning Maud Land margin: Site 693, 351b
Vekshinella stradneri, Dronning Maud Land margin: Site 692, 346b
Velicucullus altus n. sp.
 Maud Rise: Site 689, 698b, 708b
 Maud Rise: Site 690, 698b
- Wallodinium krutzschi*, Dronning Maud Land margin: Site 692, 463b
Watznaueria barnesae, Dronning Maud Land margin: Site 692, 347b
- Zeughrabdotos* sp., Dronning Maud Land margin: Site 692, 350b
Zygodiscus diplogrammus, Maud Rise: Site 690, 487b
Zygodiscus sigmoides
 Maud Rise: Site 690, 486b, 487b, 531b
 abundance, 523b
Zygodiscus spiralis, Maud Rise: Site 690, 487b
