

INDEX TO VOLUME 158

This index covers both the *Initial Reports* and *Scientific Results* portions of Volume 158 of the *Proceedings of the Ocean Drilling Program*. References to page numbers in the *Initial Reports* are preceded by “A” with a colon (A:) and to those in the *Scientific Results* (this book) by “B” with a colon (B:).

The index was prepared by Earth Systems, under subcontract to the Ocean Drilling Program. The index contains two hierarchies of entries: (1) a main entry, defined as a keyword or concept followed by a reference to the page on which that word or concept appears, and (2) a subentry, defined as an elaboration on the main entry followed by a page reference.

The index follows a standard format. Geographic, geologic, and other terms are referenced only if they are subjects of discussion. The index covers volume text, figures, and tables but not core-description forms (“barrel sheets”), core photographs, thin-section data, or CD-only tables. Also excluded from the index are bibliographic references, names of individuals, and routine front and back matter.

For further information, including available electronic formats, contact the Chief Production Editor, Ocean Drilling Program, 1000 Discovery Drive, College Station, Texas 77845-9547, U.S.A., e-mail: pub_production@ODP.TAMU.EDU.

VOLUME 158 SUBJECT INDEX

- absorption, vs. velocity, B:348
- accretion
 neovolcanic zones, A:18–21
 spreading centers, A:5–14
- active zones, geology, A:18–19
- age
 sulfides, B:111–117
 vs. uranium content, B:113–114
- alteration fronts
 geochemistry, B:265, 269–270, 289–293
 photograph, A:200
See also alteration halos; hydrothermal alteration
- alteration halos
 hydrothermal alteration, petrology, A:197
 photograph, A:86, 91, 105, 121, 132, 162, 198;
 B:246–249
 rare earths, B:266
 relation to veins, A:113–114
See also alteration fronts; hydrothermal alteration
- aluminum
 hydrothermal mounds, B:370–380
 phyllosilicates, B:242
 sulfides and sediments, B:45
 vs. calcium+sodium+potassium, B:242
- aluminum oxide
 basalts, B:217
 hydrothermal clays, B:217
 metabasaltic clasts, B:217
 mineral separates, B:28–29, 94, 370–373
 sulfides and sediments, B:43
 vs. barium, B:263
 vs. potassium oxide, B:263
 vs. sodium oxide, B:263
 vs. titanium oxide, B:263
 vs. water content, B:264
- Alvin hydrothermal zone
 heat flow, A:23–29
 hydrothermal fields, A:7–8, 16; B:391
- amorphous deposits
 hydrothermal fields, A:8
See also silica, amorphous
- anemones, hydrothermal fields, A:9
- anhydrite
 active zones, A:19
 breccia, A:71, 73–79
 fluid inclusions, B:178–190
 geochemical section, B:366–367
 geochemistry, B:46–70
 hydrothermal fields, A:7–13; B:9–11, 13–17,
 22, 42–46, 368–369
 microthermometry, B:166–170
 petrology, A:216, 219
 photograph, A:78, 80, 86–87, 91, 95, 98, 100,
 102–109, 147, 153, 156, 161, 215–217;
 B:134, 147–149, 249
 porosity vs. seismic velocity, B:313–327
 precipitation, B:119–127, 307–308
 rare earths, B:143–159
 role in growth rate of mineralization, B:411
 stable isotopes, B:85–90
 stratigraphy, A:67–68
 strontium and oxygen isotopes, B:129–141,
 306–308
 sulfur isotopes, B:19–20, 74–79
 thermal properties, B:329–335
 veins, A:68, 81–83, 86–87, 91, 95, 98,
 100–109, 144, 211
- See also* breccia; clasts; veins
- anhydrite, colloform, photograph, A:152
- anhydrite, granular, photograph, A:74
- anhydrite percentage, vs. compressional wave
 velocity, B:325
- antimony
 mineral separates, B:33
 sulfides, B:37, 39
 sulfides and sediments, B:45
 vs. depth, B:54–55, 58, 60, 62
- Argo-II, hydrothermal fields, A:16, 18–20
- arsenic
 element correlations, B:378–381, 384
 mineral separates, B:33, 37, 39, 349, 370–376,
 395
 sulfides and sediments, B:44
 vs. depth, B:54–55, 58, 60, 62, 374–376
- atacamite, hydrothermal fields, A:8
- Atlantis Fracture Zone, basalts, B:106
- bacterial cells, nucleotides, B:358–359
- banding, photograph, A:98–103; B:197
- barium
 mineral separates, B:30
 sulfides and sediments, B:43, 45
 vs. aluminum oxide, B:263
- basalts
 geochemistry, B:213–229, 269–270
 hydrothermal alteration, A:160–163, 193,
 194–199, 219
 hydrothermal fields, A:7; B:231–254
 lithology, A:202–205
 magnetic susceptibility, B:347
 osmium and rhenium, B:95–100
 photograph, A:196
 porosity vs. seismic velocity, B:313–327
 silicification and paragonitization, B:257,
 263–264
 thermal conductivity, B:332
See also glasses; igneous rocks; olivine
 basalts; pillow basalts
- basalts, altered
 geochemistry, B:281
 petrology, A:150; B:301
 photograph, A:116–117, 162, 197–199,
 217–218; B:246–248
 strontium and oxygen isotopes, B:302
- basalts, aphyric, petrology, A:163–164
- basalts, chloritized
 geochemistry, B:267, 270–271, 290–291
 photograph, B:246–248
 rare earths, B:266
 strontium and oxygen isotopes, B:302–308
 trace elements, B:53–56, 264–266
 vertical distribution, B:14–17, 237–238
- basalts, mid-ocean ridge
 geochemistry, B:307
 lead isotopes, B:104–107
- basalts, paragonitized
 geochemistry, B:291–292
 trace elements, B:53–56
- basalts, paragonitized–silicified, geochemistry,
 B:267
- basalts, silicified
 clasts, A:104–105, 107
 geochemical section, B:367
 photograph, A:126, 130
 strontium and oxygen isotopes, B:302
 vertical distribution, B:14–17, 22
- base metals
 hydrothermal mounds, B:370–380
 stratigraphy, A:11–13
See also metals; precious metals
- basement
 clasts, B:243–244
 hydrothermal alteration, B:255–276, 289–293
- bathymetry
 hydrothermal fields, A:6–7, 16–18; B:6, 131
 lead isotopes, B:105
- benthic fauna, hydrothermal fields, A:8–9
- beryllium
 mineral separates, B:30
 sulfides and sediments, B:45
- biosphere, subsurface, slow-spreading ridges,
 B:355–360
- Black Smoker Complex
 geochemical section, B:365–366
 hydrothermal fields, A:7–8, 9–13, 18–19
 lead isotopes, B:104–109
 lithostratigraphy, B:232–236
 petrology, A:199–200
 sulfur isotopes, B:76
- black smokers
 age, B:113
 fluid inclusions, B:395
 geochemical section, B:365–366
 geochemistry, B:51–52, 307
 heat flow, A:25–27
 hydrothermal fields, A:7, 9–10, 19; B:5–26
 major and trace elements, B:51–56
 rare earths in anhydrite, B:152, 157–158
 relation to veins, A:113–114
 seawater mixing, B:135–136
 strontium and oxygen isotopes, B:129–141
 sulfur isotopes, B:76
See also Black Smoker Complex; Kremlin
 white smoker field; white smokers
- bornite, petrology, B:9–11, 14
- breccia
 clasts, A:73; B:243–244
 hydrothermal fields, A:9–10, 12; B:11, 22–23,
 42–46
 mineralization, A:144
 ores, B:411–412
 osmium, B:99
 photograph, A:70–71, 73–81, 152
 rare earths in anhydrite, B:155–159
 silica, A:79–81
 stratigraphy, A:67–68
 sulfides, A:103–104
 sulfur isotopes, B:19–20, 74–79
 thermal conductivity, B:332
See also anhydrite; clasts; veins
- breccia, anhydrite, composition, A:71, 73–79
- breccia, basaltic, photograph, A:116–117, 131;
 B:248
- breccia, chert–sulfide
 deposits, A:145
 photograph, A:149
- breccia, chloritized basalt
 geochemistry, B:52
 hydrothermal alteration, A:107–109, 113
 photograph, A:116–120, 131–132; B:84
 strontium and oxygen isotopes, B:302
- breccia, massive pyrite, petrology, A:151–154
- breccia, nodular
 photograph, A:73, 75–77, 79–83, 91–92,
 127–128

- pyrite, A:70–71, 73–74
- breccia, nodular pyrite
petrology, A:158, 217, 219
photograph, A:125, 215
- breccia, nodular pyrite–anhydrite
photograph, A:216; B:147, 177
tomography, B:204–205
- breccia, nodular pyrite–silica
petrology, A:155, 158
photograph, A:156; B:177
- breccia, paragonitized basalt, strontium and oxygen isotopes, B:302–308
- breccia, pillow
geochemistry, B:269–270
photograph, B:246
rare earths, B:266
- breccia, porous, photograph, A:73, 125
- breccia, porous nodular pyrite, photograph, A:153
- breccia, pyrite
geochemistry, B:52
magnetic susceptibility, B:347
mineralization, A:144
petrology, A:70–71, 212; B:394
photograph, A:73

 thermal conductivity, B:332
 variations with depth, A:81–83, 89
See also breccia; clasts
- veins, anhydrite
 petrology, A:68, 81–83, 211; B:22, 392
 photograph, A:75–76, 86, 91, 98–109, 120;
 B:84, 147–149
- veins, chlorite, photograph, A:118
- veins, crustiform–banded, photograph, A:98–103
- veins, pyrite–anhydrite, photograph, A:93
- veins, pyrite–quartz
 lithology, A:178
 photograph, A:118–120, 122, 130
- velocity
 vs. absorption, B:348
See also compressional wave velocity; seismic
 velocity; shear wave velocity
- vents, hydrothermal fields, A:8
- vesicles, photograph, A:116, 200
- volcanic domes, hydrothermal fields, A:7
- vugs
 hydrothermal alteration, A:108
 photograph, A:92, 100, 121, 158, 192
- wallrock alteration
 hydrothermal fields, A:9–10, 12
 stratigraphy, A:67–68
- water content
 vs. major oxides, B:264
 vs. trace elements, B:265
- weathering, gossan, B:409–410
- white smokers
 geochemical section, B:366
 hydrothermal fields, A:8–10; B:307
 lead isotopes, B:104–109
 major and trace elements, B:52, 57–59
 rare earths in anhydrite, B:152, 158
 sulfur isotopes, B:76–77
See also black smokers; Kremlin white smoker
 field
- X-ray computed tomography, textures, B:201–210
- X-ray diffraction data, hydrothermal alteration,
 A:133–134
- X-ray fluorescence data
 basalts, A:204
 mud, A:163–164
- ytterbium. *See* lanthanum/ytterbium ratio;
 neodymium/ytterbium ratio
- yttrium, vs. zirconium, B:263
- zinc
 basalts, B:215, 217
 clay minerals, B:280, 283
 distribution in massive sulfides, B:405
 element correlations, B:65, 382–384
 enrichment, geochemistry, B:377
 hydrothermal clays, B:217
 hydrothermal fields, A:9–13; B:367, 370–379,
 395, 397
 metabasaltic clasts, B:217
 mineral separates, B:30, 33, 36–37, 39, 94
 pyrite, B:12
 sphalerite, B:13
 sulfides, A:93–94, 97–98, 156, 158–160,
 189–191
 sulfides and sediments, B:44
 vs. copper, B:398
 vs. depth, A:129, 160, 195; B:53, 57, 59, 61,
 374–376
 vs. water content, B:265
 zonation, B:397
- zinc/copper ratio
 sulfides, A:97–98, 158
 vs. depth, A:129
- zinc/iron ratio
 sulfides, A:97–98, 158
 vs. depth, A:129
- zinc sulfides, hydrothermal fields, A:8
- zirconium
 basalts, B:218
 hydrothermal clays, B:218
 mantle, B:225
 metabasaltic clasts, B:218
 mineral separates, B:32
 sulfides and sediments, B:43
 vs. yttrium, B:263
 zonation, hydrothermal alteration, B:11, 395, 397,
 412
 Zone 1, neovolcanic zones, A:16–18
 Zone 2, neovolcanic zones, A:16–18
 Zone 3, neovolcanic zones, A:16–18
 Zone 4, neovolcanic zones, A:16–18
