INDEX TO VOLUME 161

This index covers both the Initial Reports and Scientific Results portions of Volume 161 of the Proceedings of the Ocean Drilling Program. References to page numbers in the Initial Reports are preceded by “A” with a colon (A:) and to those in the Scientific Results (this book) by “B” with a colon (B:).

The index was prepared by Earth Systems, under subcontract to the Ocean Drilling Program. The index contains two hierarchies of entries: (1) a main entry, defined as a keyword or concept followed by a reference to the page on which that word or concept appears; and (2) a subentry, defined as an elaboration on the main entry followed by a page reference.

The index covers volume text, figures, and tables but not core-description forms (“barrel sheets”), core photographs, smear-slide data, thin-section descriptions, or CD-only tables. Also excluded from the index are bibliographic references, names of individuals, and routine front and back matter.

The Subject Index follows a standard format. Geographical, geologic, and other terms are referenced only if they are subjects of discussion. A site chapter in the Initial Reports is considered the principal reference for that site and is indicated on the first line of the site’s listing in the index. Such a reference to Site 974, for example, is given as “Site 974, A:55–111.”

The Taxonomic Index is an index relating to significant findings and/or substantive discussions, not of species names per se. This index covers three varieties of information: (1) individual genera and species that have been erected or emended formally, (2) biostratigraphic zones, and (3) fossils depicted in illustrations. A taxonomic entry consisting of both genus and species is listed alphabetically by genus and also by species. Biostratigraphic zones are listed alphabetically by genus; zones with letter prefixes are listed under “zones.”

For further information, including available electronic formats, contact the Senior Production Editor, Ocean Drilling Program, 1000 Discovery Drive, College Station, Texas 77845-9547, U.S.A., e-mail: pub_production@ODPTAMU.EDU
### Abrupt Contacts
- Thickness vs. depth, A:367
- Age, A:366
- Absolute age, volcanic glass, B:147–148
- Abundance, relative, planktonic foraminifers, B:442–447
- Acoustic imagery, downhole measurements, B:323
- Actinolite, petrography, B:358
- Advection, basement, B:296, 299, 303

### African Plate
- Convergence, B:557
- Extensional basins, A:5–11

### Age
- Argon isotopes, B:300–305
- Biostratigraphy, B:472
- Calibration fixpoints, B:474
- Control points, B:483
- Fission tracks, B:299
- Insolation cycle, B:160
- Messinian, B:547
- Nummulidid datums, B:176
- Oxygen isotopes, B:482
- Planktonic foraminifers, B:471–476
- Sedimentary cover, B:561–562
- Volcanic pebbles, B:568–569
- Volcanic rocks, B:357–373
- Vs. measured mean fission–track length, B:300
- Vs. oxygen isotopes, B:475–476, 499
- Vs. salinity, B:499

**See also**
- Chronostratigraphy; geochronology; isochrons
- Apennines, A:247–251
- Astronomical, biostratigraphic datums, B:163, 165–166, 169–170
- Age vs. depth
- Site 974, A:76; B:151, 162, 212
- Site 975, A:138; B:164, 212
- Site 976, B:34, 167
- Site 977, A:313, 318; B:34, 168
- Site 978, A:375
- Site 979, A:403; B:171
- Sites 975–976, B:514

### Al-Mansour Seamount
- Post–rift sediments, A:15, 309
- Sediment sources, A:362
- Sediments, B:80
- Tectonics, A:318; B:95, 347–348, 352, 568–569
- Volcanic rocks, B:574

### Albite, plagioclase composition, B:269

### Alboran Basin
- Biostratigraphy, B:164–169, 185–195, 223–237
- Brittle deformation, B:331–344
- Extensional basins, A:8–9; B:319–329
- Geochronology, B:295–305
- Lithofacies, B:21–36
