INDEX TO VOLUME 172

This index covers both the Initial Reports and Scientific Results portions of Volume 172 of the Proceedings of the Ocean Drilling Program. References to page numbers in the Initial Reports are preceded by “A” with a colon (A:) and to those in the Scientific Results (this volume) by “B” followed by the chapter number with a colon (B1:).

The index was prepared by Earth Systems, under subcontract to the Ocean Drilling Program. The index contains two hierarchies of entries: (1) a main entry, defined as a keyword or concept followed by a reference to the page on which that word or concept appears, and (2) a subentry, defined as an elaboration on the main entry followed by a page reference.

The index covers volume text, figures, and tables but not core-description forms (“barrel sheets”), core photographs, smear-slide data, or thin-section descriptions. Also excluded from the index are bibliographic references, names of individuals, and routine front matter.

The Subject Index follows a standard format. Geographical, geologic, and other terms are referenced only if they are subjects of discussion. A site chapter in the Initial Reports is considered the principal reference for that site and is indicated on the first line of the site’s listing in the index. Such a reference to Sites 1054–1055, for example, is given as “Sites 1054–1055, A:33–76.”

The Taxonomic Index is an index relating to significant findings and/or substantive discussions, not of species names per se. This index covers three varieties of information: (1) individual genera and species that have been erected or emended formally, (2) biostratigraphic zones, and (3) fossils depicted in illustrations. A taxonomic entry consisting of both genus and species is listed alphabetically by genus and also by species. Biostratigraphic zones are listed alphabetically by genus; zones with letter prefixes are listed under “zones.”

SUBJECT INDEX

A
advection
  carbon dioxide, B3:3
  ground water, A:288
  sediment drifts, A:7–8
age
  oxygen isotopes, B5:19
  sediments, B5:19

Sites 1063–1064, A:262
Pseudoemunotia doliolus Zone
Site 1063, B8:3
Sites 1063–1064, A:262
Pseudosolenia calcar-avis, Site 1063, B8:12, 23, 42
pseudoumbilicus, Reticulofenestra, Sites 1060–1062, A:180
Pullenia bulloides, Sites 1063–1064, A:262
Pulleniatina spp., Sites 1054–1055, A:43
puncticulata, Globoconella, Sites 1063–1064, A:261

Q
quadrilatera, Bolivinita, Sites 1056–1059, A:97

R
radiatus, Coscinodiscus, Site 1063, B8:6, 10, 21, 40
Raphoneis amphiceros, Site 1063, B8:2, 4, 12, 23, 43
Raphoneis spp., Sites 1056–1059, A:97
reinholdii, Nitzschia
Site 1063, B8:12, 43
Sites 1054–1055, A:43
Sites 1056–1059, A:97
Sites 1060–1062, A:183
Sites 1063–1064, A:262
reniformis, Coscinodiscus, Site 1063, B8:10, 49
Reticulofenestra pseudoumbilicus, Sites 1060–1062, A:180
rex, Ethmodiscus
Site 1063, B8:5, 11, 22
Sites 1060–1062, A:183
Rhizosolenia curvirostris, Site 1063, B8:12, 42
Roperia tesselata, Site 1063, B8:12–13, 23, 44
rubra, Globigerinoides, Atlantic Ocean NW, B Overview:5
Site 1063, B9:3, 9–10, 13–14
Sites 1054–1055, A:42; B9:2–3, 5–8, 11–12

S
sacculifera, Globigerinoides, Sites 1054–1055, B9:2–3, 5
sculptus, Auliscus, Site 1063, B8:8, 49
sellii, Helicosphaera, Sites 1054–1055, A:42
senarius, Actinocyclus, Site 1063, B8:7, 21, 36
sicula var., Nitzschia, Site 1063, B8:12, 22, 43
soldanii, Gyroidinoides, Sites 1054–1055, A:43
splendens, Actinocyclus, Site 1063, B8:7, 36
Stellarina stellaris, Site 1063, B8:13
stellaris, Stellarina, Site 1063, B8:13
stelliger, Podosira, Site 1063, B8:4, 12, 40
Stephanopyxis turris, Site 1063 • zones (with letter prefixes)
