

INDEX TO VOLUME 174B

This index covers both the *Initial Reports* and *Scientific Results* portions of Volume 174B of the *Proceedings of the Ocean Drilling Program*. References to page numbers in the *Initial Reports* are preceded by “A” with a colon (A:) and to those in the *Scientific Results* (this volume) by “B” followed by the chapter number with a colon (B1:).

The index was prepared by Earth Systems, under subcontract to the Ocean Drilling Program. The index contains two hierarchies of entries: (1) a main entry, defined as a keyword or concept followed by a reference to the page on which that word or concept appears, and (2) a subentry, defined as an elaboration on the main entry followed by a page reference.

The index covers volume text, figures, and tables but not core-description forms (“barrel sheets”), core photographs, smear-slide data, or thin-section descriptions. Also excluded from the index are bibliographic references, names of individuals, and routine front matter.

The Subject Index follows a standard format. Geographical, geologic, and other terms are referenced only if they are subjects of discussion. A site chapter in the *Initial Reports* is considered the principal reference for that site and is indicated on the first line of the site’s listing in the index. Such a reference to Site 395, for example, is given as “Site 395, A:13–23.”

SUBJECT INDEX

A

advection, pore water, A:30–31
alkalinity
 bacterial activity, A:30
 vs. depth, A:32
alteration minerals, lithostratigraphy, A:22
ammonium, bacterial activity, A:30
amygdules, lithologic units, A:29
Atlantic Ocean, hydrothermal processes, B2:1–12
Azimuthal Resistivity Imager, Site 395A, A:4–5

B

basalts
 lithostratigraphy, A:22
 See also lava flows; pillow basalts
basalts, aphyric, lithologic units, A:29
basement, Circulation Obviation Retrofit Kit, B2:4–5
bioturbation, lithologic units, A:28
bulk density logs, basalts, A:22
burrows, lithologic units, A:28

C

calcite, lithologic units, A:28
calcium
 pore water, A:31
 vs. depth, A:32
caliper logs, vs. depth, A:18; B2:10
carbonate content, lithologic units, A:28
chloride
 pore water, A:30–31
 vs. depth, A:32
chlorite, lithologic units, A:28

Chron 1r, magnetostratigraphy, A:29
Chron 2, magnetostratigraphy, A:29
Chron 2r, magnetostratigraphy, A:29
Chron 3, magnetostratigraphy, A:29
Chron 3r, magnetostratigraphy, A:29
Circulation Obviation Retrofit Kit
 Site 395, A:17
 Site 395A, A:3; B2:4–5
clasts, basalt, lithologic units, A:28
clay, lithologic units, A:28
clay, red, lithologic units, A:28
clays, fabric, B1:5–6
coccoliths
 microtextures, B1:4
 scanning electron micrographs, B1:9
compaction, deformation, B1:1–13
compressional wave velocity, A:21
compressional wave velocity, acoustic, vs. depth, A:31,
 33
computed gamma ray logs, vs. depth, A:19
crust, oceanic, off-axis hydrothermal processes, B2:1–12

D

Davis-Villinger Temperature Probe, Site 395A, A:3
deformation, unlithified sediments, B1:1–13
demagnetization, discrete samples, A:30
density
 fabric, B1:5–6
 fluid circulation, B2:2–3
density, bulk, vs. depth, A:31, 33; B1:10
density logs
 vs. depth, A:19
 See also bulk density logs
Dipole Sonic Imager, Site 395, A:3–4

downhole measurements, A:17–22

E

electrical logs, vs. depth, A:18

F

fluid circulation

pore water, A:31; B2:8

ridge-flank movement, B2:2–3

foraminifers

lithologic units, A:28

scanning electron micrographs, B1:9

foraminifers, planktonic, preservation, B1:4

Formation Microscanner imagery

sediments, B2:3–4

Site 395, A:21

vs. depth, A:18

G

gamma-ray logs. *See* computed gamma ray logs; spectral
gamma ray logs; total spectral gamma ray logs

Gauss Chron, magnetostratigraphy, A:29

geochemistry, inorganic

Site 395A, A:8

Site 1074, A:29–31

Gilbert Chron, magnetostratigraphy, A:29

graded bedding, lithologic units, A:28

H

heat flow

fluid circulation, B2:2–3

Site 395, A:14

Site 1074, A:32

hole azimuth logs, vs. depth, A:18

hole deviation logs, vs. depth, A:18

hydrothermal processes, off-axis, oceanic crust, B2:1–12

I

illite, lithologic units, A:28

index properties, Site 395A, A:8

induction log deep, vs. depth, A:18

isotherms, water flow, A:15

L

Laterolog deep, vs. depth, A:18; B2:10

Laterolog shallow, vs. depth, A:18

lava flows, lithostratigraphy, A:22

lithic component, lithologic units, A:28

lithologic units

Site 1074, A:28–29

Unit I, A:28

Unit II, A:29

lithostratigraphy

Site 395, A:5–7, 22

Site 1074, A:28–29

M

magnesium

pore water, A:31

vs. depth, A:32

magnetic fabric, deformation, B1:4–5

magnetic foliation

magnetic fabric, B1:4–5

vs. depth, B1:10, 12–13

vs. magnetic lineation, B1:11

magnetic inclination

chrons, A:29

vs. depth, A:29; B1:10

magnetic lineation

magnetic fabric, B1:4–5

vs. depth, B1:10, 12–13

vs. magnetic foliation, B1:11

magnetic susceptibility, vs. depth, A:31, 33; B1:10, 12–13

magnetostratigraphy, chrons, A:29

Matuyama Chron, magnetostratigraphy, A:29

microtextures, deformation, B1:4

Mid-Atlantic Ridge

hydrothermal processes, B2:1–12

well-logging, A:3–35

mottling, lithologic units, A:28

multisensor track, Site 395A, A:8

N

nannofossils, microtextures, B1:4

neutron porosity logs, vs. depth, A:19; B2:10

North Pond

hydrothermal processes, B2:1–12

lithostratigraphy, A:22

well-logging, A:3–35

nuclear logs, vs. depth, A:19

O

Olduvai Subchron, magnetostratigraphy, A:29

ooze, foraminifer, lithologic units, A:28

ooze, nannofossil, lithologic units, A:28

oxygen isotopes, pore water, A:30

P

paleomagnetism, A:29

permeability, Circulation Obviation Retrofit Kit, B2:4–5

photoelectric factor logs, vs. depth, A:19

physical properties

Site 395A, A:7–9

Site 1074, A:31–32

pillow basalts, lithostratigraphy, A:22

plagioclase, lithologic units, A:28

pore water

advection, A:30

geochemistry, A:31

porosity

fabric, B1:5–6

vs. depth, B1:10

See also void space

porosity logs. *See* neutron porosity logs

potassium
 pore water, A:30–31
 vs. depth, A:32
potassium logs, vs. depth, A:19
preservation, microfossils, B1:4–6
pressure
 amplitude and phase of basement pressure, B2:12
 vs. time, B2:11

R

radiolarians, lithologic units, A:28
remanent magnetization, anhysteretic, vs. isothermal re-
 manent magnetization, A:30
remanent magnetization, demagnetization, A:29
remanent magnetization, isothermal, vs. anhysteretic
 and natural remanent magnetization, A:30
remanent magnetization, natural, vs. isothermal rema-
 nent magnetization, A:30
resistivity, measurements and images, A:20, 22
resistivity logs
 sediments, B2:3–4
 Site 395, A:21; B2:10

S

salinity, pore water, A:30–31
sand, lithologic units, A:28
sedimentation, pelagic, lithologic units, A:29
sediments, fluid circulation, B2:2–3
sediments, pelagic, lithologic units, A:28
sediments, unlithified, deformation, B1:1–13
seismic profiles, A:26
shear wave velocity, A:21
silica
 pore water, A:30–31
 vs. depth, A:32
Site 395, A:13–23
 background and objectives, A:13–16
 Circulation Obviation Retrofit Kit, A:17
 downhole measurements, A:3–9, 17–22
 hydrothermal processes, B2:1–12
 lithostratigraphy, A:5–7, 22
 operations, A:16
 physical properties, A:7–9
 site description, A:13–23
 temperature, A:16–17
Site 1074, A:25–35
 background and objectives, A:25
 coring, A:27
 heat flow, A:32
 hydrothermal processes, B2:1–12
 inorganic geochemistry, A:29–31
 lithostratigraphy, A:28–29
 operations, A:25–28
 paleomagnetism, A:29
 physical properties, A:31–32
 site description, A:25–35

sonic logs
 vs. depth, A:18
 waveforms, A:22
spectral gamma ray logs
 vs. depth, A:19
 See also total spectral gamma ray logs
spherical focused logs, vs. depth, A:18
spontaneous potential logs, vs. depth, A:18; B2:9
stairstep structure, scanning electron micrographs, B1:9
strontium
 pore water, A:30
 vs. depth, A:32
sulfate
 bacterial activity, A:30
 vs. depth, A:32

T

temperature
 gradient log, A:20
 Site 395, A:8, 16–17
 vs. corrected depth, A:17
 vs. depth, A:20; B2:9
 vs. time, A:16; B2:11
 well-logging, B2:3–4
temperature, in situ, Adara core shoe probe, A:34
temperature gradient logs, vs. depth, A:18
thermal conductivity
 needle probe, A:31–32, 34
 Site 395A, A:8
 vs. depth, A:32, 34
thorium logs, vs. depth, A:19
time, vs. temperature, A:16
total spectral gamma ray logs, vs. depth, A:19
transmissivity, Circulation Obviation Retrofit Kit, B2:4–5

U

Unit IA/IB boundary, pore water, A:30
uranium logs, vs. depth, A:19

V

velocity. *See also* compressional wave velocity; shear
 wave velocity
void space
 scanning electron micrographs, B1:9
 shape and volume, B1:4

W

water flow, isotherms, A:15
well-logging
 Site 395, A:17–22
 Site 395A, A:3–9
 temperature, B2:3–4
