INDEX TO VOLUME 185

This index covers both the *Initial Reports* and *Scientific Results* portions of Volume 185 of the *Proceedings of the Ocean Drilling Program*. References to page numbers in the *Initial Reports* are preceded by “A” followed by the chapter number with a colon (A1:) and to those in the *Scientific Results* (this volume) by “B” followed by the chapter number with a colon (B1:).

The index was prepared by Earth Systems, under subcontract to the Ocean Drilling Program. The index contains two hierarchies of entries: (1) a main entry, defined as a keyword or concept followed by a reference to the page on which that word or concept appears, and (2) a subentry, defined as an elaboration on the main entry followed by a page reference.

The index covers volume text, figures, and tables but not core-description forms (“barrel sheets”), core photographs, smear slide data, or thin section descriptions. Also excluded from the index are bibliographic references, names of individuals, and routine front matter.

The Subject Index follows a standard format. Geographical, geologic, and other terms are referenced only if they are subjects of discussion. A site chapter in the *Initial Reports* is considered the principal reference for that site and is indicated on the first line of the site’s listing in the index. Such a reference to Site 801, for example, is given as “Site 801, A3:1–128.”

The Taxonomic Index is an index relating to significant findings and/or substantive discussions, not of species names *per se*. This index covers three varieties of information: (1) individual genera and species that have been erected or emended formally, (2) biostratigraphic zones, and (3) fossils depicted in illustrations. A taxonomic entry consisting of both genus and species is listed alphabetically by genus and also by species. Biostratigraphic zones are listed alphabetically by genus; zones with letter prefixes are listed under “zones.”

SUBJECT INDEX

A

accr eletion
- crust, B1:5–6
- sediments, A1:5
acetate
- manganese reduction, B3:7
- vs. depth, B1:31; B3:11
age, argon isotopes, A3:67
age controls, deep-sea sediments, B7:1–21
age spectra, argon isotopes, B13:3–6, 10, 12
age vs. depth, argon isotopes, B13:14–16
Albian, radiolarians, B6:4
alkalinity, vs. depth, A4:113
Alps Southern, Cretaceous, B5:13
alteration
- basalt, A3:25–31
- chemical composition, A3:124
- deep-sea sediments, B7:1–21
- geochemistry, A3:27–28
- Jurassic basement, A1:18
- photograph, A1:47
- photomicrograph, A1:57–58; A4:83–84
- sediment/basement boundary, A1:25–26
- volcanic ash, A4:28–29

See also authigenesis; hydrothermal alteration; microbial alteration; silicification
alteration, gray-green
- basalt, A3:26
- photograph, A1:47
- vs. depth, A3:120–121
alteration, green, vs. depth, A3:120–121
alteration intensity, photograph, A4:110
alteration, pale green
- basalt, A3:26
- vs. depth, A3:120–121
alteration types, vs. depth, A3:120
aluminum
- deep-sea sediments, B7:5
See also barium/aluminum ratio; iron/aluminum ratio; manganese/aluminum ratio; niobium/aluminum ratio; silica/aluminum oxide ratio; strontium/aluminum ratio
aluminum/titania nium ratio, vs. depth, A4:124
aluminum logs
- lithologic units, A4:46
- vs. depth, A4:140–141
aluminum oxide
- basalt alteration, A3:17
- vs. magnesium oxide, A3:108
See also magnesium oxide/aluminum oxide ratio;
phosphorus oxide/aluminum oxide ratio; potassium oxide/aluminum oxide ratio; sodium oxide/aluminum oxide ratio

ammonium
organic matter, B3:5
redox, A4:27
vs. depth, A4:113; B1:31; B3:11
vs. magnesium, A4:118

anisotropy
microfabrics, B9:6–7, 29
vs. depth, B9:17
anisotropy, compressional wave velocity, vs. depth, A4:137

anoxic events
Jurassic basement, A1:18
Valanginian, B1:10
Aptian, radiolarians, B6:4
arc basalts, barium/sodium ratio, A1:39
argon isotopes
age, A3:67
volcanic ash, B13:1–20
Asseni–Verbeeki Zones, radiolarians, B6:4
augite phenocrysts, basalt alteration, A3:25–26
authigenesis, volcanic ash, A4:28–29

backarcs, sediments, A1:7, 26–27
bacteria
depth water, B3:1–11
photograph, A1:56
sediments, A1:5–6, 56
vs. depth, B1:31
Bajocian, lithologic units, A3:8
barite, photograph, A4:86
barium, sediment flux, A1:39
barium/aluminum ratio
sediments, A1:24
vs. depth, A1:55; A4:122
barium/sodium ratio, arc basalts, A1:39
Barremian
radiolarians, B6:3–4
sedimentation rates, A1:53
basalt
alteration, A3:25–31; A4:25–26
geochemistry, A3:15–18; A4:24
ion concentration, B11:11
magnetic inclination, A3:32–35
permeability, B11:6
petrology, A3:14–15
vs. depth, A1:48
wet and dry resistivity, B12:15–16
basalt, altered, photograph, A3:79–85
basalt, brecciated, photograph, A4:98–100
basalt/sediment contacts, alteration, A3:24–25
basalt alteration intensity, photograph, A4:110
basalt clasts, photograph, A3:87; A4:100
basalt flows, aphyric
lithologic units, A3:11–12; A4:22–23
photograph, A3:82–89

basement
age, A3:67
age and nature, B1:4–5
Jurassic, A1:15–19
lithologic units, A3:10–12; A4:22–23

See also sediment/basement boundary
Bathonian, lithologic units, A3:7
bathymetry, maps, A1:37; A3:65; A4:53, 58
bedding planes
lithologic units, A4:15–16
photograph, A4:80
Berriasian, nanofossils, A4:21
beryllium isotopes, lithologic units, B1:13
biochronology, radiolarians, B6:1–17
bioevents
nanofossils, B5:5
silicoflagellates, B4:15
biosphere
sediments, A1:5–6, 26–27, 29–30
volcanism, B1:17
biostratigraphy
diatoms, B2:1–31
nanofossils, B5:1–21
sedimentation rates, A1:53
silicoflagellates, A3:7–9; B4:1–18
Site 1149, A4:19–21
bioturbation
lithologic units, A4:15–16
photograph, A4:67, 69–70
boron, oceanic crust age, B1:15
breccia
alteration, A3:19–23, 29–31
basalt alteration, A4:25–26
composition vs. depth, A3:111
distribution, A3:77
lithologic units, A3:13
photograph, A3:114
vs. depth, A1:54; A3:110; A4:23, 111
breccia, hyaloclastite, photograph, A3:86
breccia, interpillow, photograph, A3:79, 82–83, 86–87
breccia alteration intensity, photograph, A4:110
breccia density, vs. depth, A3:22–23
Brunhes Chron, deep-sea sediments, B7:7
Brunhes/Matuyama boundary, deep-sea sediments, B7:7–9
bulk density logs, vs. depth, A4:139
burrows
lithologic units, A4:15–16
photograph, A4:80–82

calcispheres, photomicrograph, A3:118

calcite
basalt alteration, A3:25–26; A4:25–26
interpillow material, A3:24–25
Jurassic basement, A1:18
calcite (continued) • chronostratigraphy, volcanic ash

photograph, A3:113
photomicrograph, A1:47; A3:117–118; A4:83–84
vesicles, A4:24
X-ray diffraction data, A4:85, 92
calcite cement, photograph, A4:98–100
calcite veins, alteration, A3:20, 29–31
calcium
basement alteration, A4:29–30
vs. depth, A4:117
vs. magnesium, A4:118
See also potassium/calcium ratio
calcium logs
lithologic units, A4:46
vs. depth, A4:140–141
calcium oxide
deep-sea sediments, B7:6
lithologic units, B1:11
vs. age, B7:20
vs. depth, B1:26
vs. isothermal remanent magnetization, B7:14
vs. volcanic ash, B7:14
caliper logs, vs. depth, A1:48, 54; A4:138–141; B8:12
Callovian, lithologic units, A3:7
Campanian, lithologic units, A3:6
Capriolo, Cretaceous, B5:13
carbon dioxide
alteration, A3:27–28
basalt alteration, A3:16–18
Jurassic basement, A1:18
vs. depth, A3:123
carbon isotopes
lithologic units, B1:12
stratigraphy, B6:1–17
carbonate cement, photograph, A3:87
carbonate compensation depth
limestone, A3:9
sediment alteration, A4:32
carbonate content, sediments, A4:159
carbonate groundmass, photomicrograph, A4:83
carbonate matrix, photograph, A3:86
carbonate veins, vs. depth, A4:112
carbonates
diagenesis, A4:27–28
interpillow material, A3:116
vs. depth, A3:111–112
carbonates, core, vs. depth, A4:112
celadonite
basalt alteration, A4:25–26
interpillow material, A3:116
photograph, A3:87, 113, 114
photomicrograph, A3:117
vesicles, A4:24
vs. depth, A3:111
celadonite veins, alteration, A3:20–21, 29–31
Cenozoic
lithologic units, A3:6
sedimentation rates, A1:53
stratigraphy, A1:9–10
Cenozoic, upper, silicoflagellates, B4:15
Central American Seaway, closure, B4:1, 9
cerium, lithologic units, B1:13
chalcedony
crystallinity index, B10:2
interpillow material, A3:24–25
photomicrograph, A1:47; A3:117–118; B10:6, 8–9
chalcedony veins, alteration, A3:21
chalk
ion concentration, B11:10
permeability, B11:6
Upper Cretaceous, A4:17–19
chalk, radiolarian
lithologic units, A4:15–16
photograph, A4:88–91
photomicrograph, A4:83–84
chert
ion concentration, B11:11
lithologic units, A3:7
permeability, B11:6
photograph, A3:78, 82; A4:87
photomicrograph, A3:117
recrystallization, B10:1–11
seismic stratigraphy, A4:4–6
stratigraphy, A1:9–10
Upper Cretaceous, A4:17–19
X-ray diffraction data, A4:85
chert, pink, photograph, A4:78
chert, radiolarian
deposition, A3:9
lithologic units, A3:7; A4:14–16
photograph, A4:80
chilled contacts
lithologic units, A3:12; A4:96
photograph, A3:114; A4:96–97
photomicrograph, A3:94, 99–100
chloride
basement alteration, A4:29–30
vs. depth, A4:119
vs. magnesium, A4:118
chloride logs
lithologic units, A4:46–47
vs. depth, A4:140–141
chlorite, X-ray diffraction data, A4:66; B9:20
chromium
basalt alteration, A3:17
deep-sea sediments, B7:5
vs. age, B7:20
