INDEX TO VOLUME 206

This index covers both the Initial Reports and Scientific Results portions of Volume 206 of the Proceedings of the Ocean Drilling Program. References to page numbers in the Initial Reports are preceded by “A” followed by the chapter number with a colon (A1:) and to those in the Scientific Results (this volume) by “B” followed by the chapter number with a colon (B1:).

The index was prepared by Earth Systems, under subcontract to the Ocean Drilling Program. The index contains two hierarchies of entries: (1) a main entry, defined as a keyword or concept followed by a reference to the page on which that word or concept appears, and (2) a subentry, defined as an elaboration on the main entry followed by a page reference.

The index covers volume text, figures, and tables but not core-description forms (“barrel sheets”), core photographs, smear slide data, or thin section descriptions. Also excluded from the index are bibliographic references, names of individuals, and routine front matter.

The Subject Index follows a standard format. Geographical, geologic, and other terms are referenced only if they are subjects of discussion. A site chapter in the Initial Reports is considered the principal reference for that site and is indicated on the first line of the site’s listing in the index. Such a reference to Site 1256, for example, is given as “Site 1256, A3:1–396.”

The Taxonomic Index is an index relating to significant findings and/or substantive discussions, not of species names per se. This index covers three varieties of information: (1) individual genera and species that have been erected or emended formally, (2) biostratigraphic zones, and (3) fossils depicted in illustrations. A taxonomic entry consisting of both genus and species is listed alphabetically by genus and also by species. Biostratigraphic zones are listed alphabetically by genus; zones with letter prefixes are listed under “zones.”

SUBJECT INDEX

A
accretion, crust, A1:10–11
age vs. depth
basement, A1:41; A3:103
Neogene nannofossil datums, A1:64; A3:129; B2:21
summary, A3:121–122
albite
alteration, A3:66
basement secondary mineral geochemistry, B8:3
photograph, A3:208
photomicrograph, A3:209–211, 222
replacement, B7:3
veins, A1:32
alkalinity
pore water, A3:38
vs. depth, A3:148
alteration
basement, A3:65–73
geochemistry, A3:236; B8:1–16
photograph, A3:218–219, 282
spectroscopy, B12:1–13
See also hydrothermal alteration
alteration front, photomicrograph, A3:235
alteration halos
composition, A3:66–73
lava, B1:7
photograph, A3:218, 224, 229, 231–232, 237
photomicrograph, A3:225–228, 230
See also oxidation halos
alteration halos, black, composition, A3:68
alteration halos, brown, composition, A3:68–69
alteration halos, mixed, composition, A3:69
alteration types, vs. depth, A1:90; A3:223
alteration zones, vs. depth, A1:95; A3:256
aluminum
hyaloclastite, A3:70
intensive low-temperature hydrothermal alteration, A3:71
sediments, A3:42
shipboard vs. shore-based digestion, B3:14
shore-based flux vs. shore-based microwave acid digestion, B3:12–13
vs. depth, B3:15
See also calcium/aluminum ratio; iron/aluminum ratio
aluminum/titanium ratio, vs. depth, B3:16
aluminum oxide
vs. depth, A1:81; A3:152, 194; B5:6
vs. magnesium number of clinopyroxene, B5:25
vs. magnesium oxide, A1:88; A3:199
ammonium
  pore water, A3:38
  vs. depth, A3:148

amphibole
  photograph, A3:238, 243
  photomicrograph, A3:239–241

amygdules, photograph, A3:244, 269

anorthite, basement secondary mineral geochemistry, B8:3

apatite
  basement secondary mineral geochemistry, B8:3, 16
  groundmass, A3:57–59
  photomicrograph, A3:210
  replacement, B7:3

aragonite
  photomicrograph, A3:205
  veins, A3:72; B10:1–6

augite
  basalts, A1:29; A3:57; B5:6
  grain size vs. depth, A3:61–63, 187; B5:9–10
  groundmass, A3:57–59
  photomicrograph, A3:220
  augite, granular, photomicrograph, A3:183
  augite microphenocrysts, photomicrograph, A1:80; A3:178
  augite phenocrysts, photomicrograph, A3:179

barite, mass accumulation rates, A3:44

barium
  lava, B1:7
  shipboard vs. shore-based digestion, B3:14
  shore-based flux vs. shore-based microwave acid digestion, B3:12–13
  vs. depth, A3:152; B3:15; B6:6
  barium/lanthanum ratio
    basement, B6:3
    vs. depth, B6:7
  barium/titanium ratio
    mass accumulation rates, A3:45–46
    sediments, A1:25; A3:154
    vs. depth, A1:67; B3:16

basalts
  average grain size, A3:373–374
  digital imaging, A3:90–93, 318–320
  digital photomicrograph log, A3:372
  lithologic units, A3:53–65
  microbiology, A1:34–35
  modal analysis data, A3:371
  paleomagnetism, A1:33–34
  petrography, A1:28–30; A3:55–64
  photograph, A3:213, 224, 237–238, 244
  photomicrograph, A3:177–186, 309
  physical properties, A1:34
  recrystallization, A3:59–64
  scanning electron microscopy, B5:16, 18, 20
  structure, A1:32–33
  textures, B5:1–32

calcite
  basement secondary mineral geochemistry, B8:3, 16
replacement, B7:3
veins, A3:72; B10:1–6
