- vs. pahoehoe lava classification, 183B14:20–21

AACT. *See* aluminum activation clay tool; aluminum logs

ablation

- Antarctica, 114B31:590
- volcanic ash, 198B18:7–8
- vs. sea-surface temperature, 188B14:32

ablation, glacial, shelf edge, 141A8:251–253

abrasion loss of weight

- hardness, 137/140B31:347–348
- vs. shore hardness, 137/140B31:349

abrupt contacts

- thickness, 161A8:367
- vs. depth, 161A8:366

absolane-buserite, manganese nodules, 138B40:807–810

absolute age

- biostratigraphy, 150B3:44–46; 5:69, 73, 75–78; 154B1:8–9
- carbonates, 150B17:320–321
- correlation, 177A5:44–45; 6:38
- deduced from magnetostratigraphy, 151A5:78
- strontium-derived, 150B17:326
- volcanic glass, 161B12:147–148
- volcanism, 157A2:16–17

See also geochronology; radiometric ages

absolute pole, rotations, 199B21:21

absorbance, vs. depth, 201B9:6

absorption

- phosphorus, 154B32:479–481
- vs. velocity, 158B25:348
- X-ray pole figure goniometry, 131B11:145

abyssal environment

- biostratigraphy, 182A8:19; 189A6:33
- indicators, 130B5:72–75
- ocean circulation, 210A1:32
- paleoenvironment, 181A7:25–26
- Upper Cretaceous, 129B12:232

abyssal facies, clay mineralogy, 131B28:347

abyssal hills

- morphology, 139A2:19–20
- sources of basalts, 136B9:116

abyssal plains

- age constraints, 204B3:4–5
- basement tectonics, 149B38:612–614
- deposition, 189A1:7
- geology, 157A1:5–10; 200A1:3–4

lithology, 173A9:273

ocean–continent transition, 149B47:723–724

sedimentation, 146A(1)7:374; 173A9:293

sorting, 146B(1)1:9

Acanthaceae, Site 717, 116B21:255

Acanthostyles, Site 795, 127/128B(1)30:542

Acanthoxeas, Site 795, 127/128B(1)30:542

Acanthstrongyles, Site 795, 127/128B(1)30:542

acarininids

Atlantic Ocean S subantarctic, 114A5:103; 6:170; 7:382

vs. depth, 198B9:14

acceleration

autocorrelation, 179B1:12–13

spectra, 179B1:11

vs. depth, 179B1:16–17

vs. time, 191A4:118

well-logging, 199A11:80

See also horizontal acceleration logs; normalized vertical tool acceleration logs

accelerometers, amplitude spectra, 179A5:21

accessory components

distribution, 188B4:35, 37

foraminifers, 188A4:110

sediments, 188A3:73–76, 191; 5:97; 188B4:10–12, 16–17, 19–20

accessory minerals

abundance vs. depth, 145A7:308
