

MANUSCRIPT AND PHOTOGRAPH COPYRIGHT LICENSE AGREEMENT

This form must be filled out on paper and mailed to:

Publications Coordinator, Ocean Drilling Program, 1000 Discovery Drive, College Station TX 77845, USA

The Texas A&M Research Foundation desires to obtain a written copyright license before incorporating any type of material, which may not be in the public domain, into our computerized databases or other publication formats; therefore, we ask that you complete this license agreement.

If your research results, data, or photographic materials are legally in the public domain, or you consider them to be in the public domain, then a written statement signed by you to that effect will suffice. If applicable, please include in the statement any relevant funding agency information, such as grant or contract numbers.

Execute an individual license agreement for each submission you are making (e.g., a manuscript, which may contain photographs, or a set of photographs is considered one submission), and send the license agreement(s) to us along with the relevant manuscript(s) and/or photograph(s). We also request that you either type or neatly print all information to ensure legibility. You may keep a copy for your records. Another copy will be returned to you once the form is signed on behalf of the Texas A&M Research Foundation and the manuscript and/or photograph is accepted for publication.

This Agreement is made and entered into this ____ day of _____, 200__,
by and between _____ (the "Author[s]")
and the Texas A&M Research Foundation (the "Foundation").

In the space below list the title, description, or other information that will identify the manuscript(s) or photographs submitted (use back of page if there is not enough room on these lines):

hereinafter referred to as "the Submission" which has been submitted to the Foundation for incorporation in the *ODP Proceedings* or other publication of the Ocean Drilling Program. The Author(s) represents and warrants that the Submission (1) is original to the Author(s); (2) does not infringe any other copyright; and (3) contains no material from other copyrighted work and that the Author(s) has the right and/or authority to grant to the Foundation the rights herein conveyed as to such copyrighted work. The Author(s) grants to and authorizes the Foundation, the National Science Foundation, and the Joint Oceanographic Institutions, Inc., their respective agents, employees, and assigns, the non-exclusive, worldwide, royalty-free right to record, edit, copy, reproduce, publish, distribute, and use all or any part of the Submission for any purpose in any media now existing or hereafter developed, either individually or as part of a collective work, or to make any revision of a previous publication of such Submission.

The term of this Agreement shall continue for the maximum period permitted under Title 17, United States Code, Section 302.

The Author(s) acknowledges and agrees that he/she/they will receive no remuneration beyond the stipend paid, if any, for program participation for the rights assigned hereunder.
